FOLDING SURPRISE CARD for MOTHER'S DAY

Remember, Mother's Day is not just for moms. Grandmothers, aunts and any wonderful lady who has made a loving impact on your life would appreciate you thinking of them. The included video has lots of clever project ideas. Our assignment is introduced at the 3:40 minute mark of the video. Pause it, and view a few times, especially to get the folding parts correct.

Directions:

- Fold a piece of paper in half.
- Then fold over only the top half (bring it towards you) folding it so it lays $\frac{1}{2}$ " longer than the original halfway point.
- Above the $\frac{1}{2}$ way point (on what is now the back portion of the paper) draw the top of a present.
- On the front fold, draw the bottom of the present.
- It's fun to open the front realizing you've created magical space in between the top and bottom of your present drawing.
- Fill this area with hearts.
- Work a personal message into either the front of the card, or the inside surprise portion.
- Color with crayons or markers
