

Difficulties Signing into Google Classroom

I'm logged into Google Classroom, but cannot find my class.

If you are having problems seeing your class in Google Classroom, check to make sure you are logged in to Google Classroom on your computer. With multiple people sharing a device, we have found if one person does not sign out of their Google account, the next person has difficulties seeing their files.

MAKE SURE YOU'RE LOGGED IN UNDER YOUR NAME: To see who is signed in on the computer, click on the circle on the far right of the address line for Google Chrome. When you click on the circle it will drop down a box that shows who is signed in on the computer. If it is not the account for the child trying to access their account, sign out and then reload the Google Classroom app.
