MAKE COFFEE FILTER ART

All you need are clean coffee filters and regular washable markers. Start in the middle with a dot or small circle and draw around and around with various colors. When the entire coffee filter is full of circle patterns, either wet it with a spray bottle of water or paint with a paintbrush and clear water. Watch the colors run together like watercolors. Once dry, you can add eyes or even legs and tails out of a second filter cut down into pieces, creating little animals and monsters.

DRAW ANYTHING FROM NUMBERS

Using a black marker draw out numbers 1-9 using serifs. (That means drawing the foot of numbers, so they look like this **1**, instead of just a simple line for the number one. Turn the number one into a boat, turn 2 into a swan, turn 3 into a bunny, etc...

A great YouTube vid that'll show you how:

MAKE HOMEMADE PAINT + CREATE A ROOSTER USING PLASTIC FORK

Have your parents or an older sibling help you a little with this easy, non-toxic recipe.

STEP 1) 1 cup white flour. 1 cup of regular salt. Mix together. Add 1 cup of water, blend together until smooth. Divide into 3 plastic sandwich bags. Add few drops of liquid food coloring to each bag. I'd use the 3 primary colors: red, blue, yellow. Gently squish until well blended. When ready to paint, snip a little hole out of one corner of the bag.

STEP 2) On a piece of paper, with black marker (use a Sharpie if you have it) draw a simple rooster, looking at it from the side. Body, beak, comb (red stuff on his head like a crown). Apply the paint using the cut hole in the plastic bag and squeeze it out as if it were frosting. Create texture of feathers and tail by spreading the paint with plastic fork instead of paint brush!

WATERCOLOR LANDSCAPE INSIDE A CIRCLE

On a sheet of paper trace a round plate so you have a circle. Inside circle, with light pencil, draw mountains across the middle of the circle, then watercolor only the sky. Let the paint touch the outline of the mountains, but not go inside them. Blend colors and let them “bleed” together. Adding more water for a blurry effect is good. If you don’t have watercolors at home, you can use markers and blend with a paint brush and water or use a Q-tip instead of a paint brush. The bottom half of the circle will be finished only with black marker. Create shadows, using LINE, only one side of the mountain range (you choose right or left). Draw lines for foothills and create trees in the foreground.

Once you get the technique down, create a second artwork. Draw the outline of beach cottages or one or two beach balls sitting in sand. Watercolor only the sky above. With thin, black marker create the details in the lower half of the composition.

DRAW A 3D HOLE

Optical illusions are really fun and teach us the power of LINE. All you need for this project is a pencil, straight edge (use a ruler or the side of a book) paper and a black marker.

With pencil, draw square in the middle of your paper.

Create a diagonal line inside square from one corner to the other.

Create L's evenly spaced apart, turning on the diagonal.

Fill every other one with black marker, starting with the small square that's now been created at the bottom corner and outline the whole square for finishing touch.

Shade with pencil for a finishing touch. This is using the Element of Value: darker at the bottom of your newly created hole, lighter as you rise to the top.

DRAWING DESCRIPTION PROJECT

Grab a parent or sibling for a partner and have fun with this project using the included power point featuring famous pieces of art. One person looks at the art and describes it. The other draws based on the description. Use proper art terms like background, middle ground and foreground and the Elements of Art: line, shape, value, form, color, texture, space.

If you can't access the power point don't worry. Any interesting picture from a magazine or book may be used. One person describes the pictures, the other person draws based on the detailed, verbal description.

Power point for this project is located in 5th grade Google classroom.

If you can, use the power point:
